

We are Process Servers for International Private Personal Service of Process and/or Subpoenas everywhere, in all cities of Hague and Non Hague signatory countries. Registered Barristers-Solicitors and authorized Process Servers by the Ministry of Justice within the E.E.C. we have experience in the field with a track record of never a quash.

Our [prices](#) depend on the kind of service and time to serve, [click here for FAQ](#); We can serve rush from 72 hrs or regular simple serve of 15 days, our service are;

I. "**Direct Hague Central Authority submission and follow up**": This service consist of a fast and controlled manner to the use of the "Central Authority of each European Hague Signatory Country" and is based in the use of a "Summary translation" by "Local Certified Translators" submitted by a local Barrister-Solicitor, either for Service of Process (For instructions on this service [click here](#)), or for Subpoenas (For instructions on service of Subpoenas [click here](#)). These services includes;

1. Local Central Authority **Filing and Screening** for acceptance (Only Civil and Commercial).
2. Establish an **estimate** cost of translation if a summary of the case is not acceptable.
3. **Follow up** of the local procedure followed by the Central authority in order to remove any obstacle and avoid any possible "Reject" from the Central Authority (We can not control refusal of Service by addressee in this method).

II. "**Private Personal Service of Process**": This is a "hand to hand delivery", completed by European Barristers-Solicitors acting as international process servers; it is the fastest and more reliable method to serve, requires no translation of documents and there is no exam by the Central Authority. The importance of this kind of service is that "**can't be rejected**" neither by the "addressee" nor by the Central Authority. There is No lost of confidentiality either and evidence of service is included in the price along with a Notarized Affidavit of Service such as Video, Photography or a Signed Reception Receipt by the addressee. This service can be reinforced with other methods of service.

Please note that because of our reputation, which is based on our impartiality and integrity, some Central Authorities will issue an [Affidavit](#) of service confirming our International Private Service of Process or will call our services when they fail. In regular services you will receive a custom made affidavit of service authenticated by the local Consular Agent of your country, in English and immediately sent to your office by DHL.

For International Private Personal Service of Process instructions [click here](#) and for price list [click here](#), it is Simple! Fast! Reliable! Ans service is guaranteed in court or your money back!.

III. "**Local Judicial Officers Service of Process**", It is the same as above but completed by a Judicial Officer. We will certify service of process with an Affidavit in English, either authenticated by the Consular representative or by the Central Authority, when service is completed by a local Judicial Officer acting under our supervision. This control is essential when service is completed by a local process server who does not speaks English and has no time to authenticate his work at the local Consular offices. Main advantage is that in some countries a "Public Record of Service" is kept and is available for verification when "Exequatur" is needed. Unfortunately, some lean persons are acting as "Judicial Officer Brokers" causing a break in the chain of legality and confidentiality.

IV. "**Special Process Server**" We accept all foreign Court mandates to serve, where we are named directly by the Court to serve, in case of Emergency where a rush service is essential or in difficult to serve cases and locations, or pretrial "Judicial or Extra-Judicial and mostly to serve in none hague countries based on U.S. Federal Regulation 4. We serve and include in our Affidavit, evidence of service, witnesses of service, legal documentation back up, anywhere within Eastern or Western Europe and the Russian Federation. This service is recommended for highly confidential cases. The cost is double of our International Private Personal Service of Process because of risk.

V. "**Legal Courier**" as per Article 10 - a of the Hague Convention, not recommended for Countries that are not signatories of the Hague Convention or for those that oppose to Article 10 a of it, it can be used to reinforce a Private Personal service. Service by mail can be very easily quashed. We will issue an Affidavit of service authenticated but will not guarantee this service against a motion to quash.

VI. "**Parallel Service**" Once you have ordered legal process service either to the Central Authority, Mail, Judicial Officer or Private Personal and as a measure of International Inter-Attorney courtesy, reinforcement for litigation security, extra guarantees and other reasons. Serving another set of documents is a preventive measure that ensures reception and protects you. We can complete International Private Personal Service of Process as Barristers-Solicitors and reinforce it with a parallel service by mail, by a Judicial Officer or by the Central Authority. This service is highly desirable in application of Article 5 of the Hague Convention that is to say when the Central Authority fails and prior their Authorization to serve.

VII. "**Private Subpoena Service**": Either as Parallel Service to a Letter of Request sent to the Central Authority or if in application of Common law Court acceptable principles to accelerate a court case process and gain time, and which will be confirmed afterwards by the Central Authority.

VIII "**Depositions**" Most foreign Central Authorities will not accept to take a Deposition or Evidence in Pre-Trial situations, or those submitted to Arbitration, that is to say: Extra-Judicial situation. Consular services depositions can not be held outside the Consular premises and Consular Agents will not travel to take a deposition. We take depositions and evidence everywhere in Europe and if needed making the necessary arrangement for a translator. We propose Telephone conference, Video taped depositions or by written Questionnaire in presence of a local notary public.

IX. "**Registered Agents of Contracts**" within the European Economical Community only, also called Statutory agents for Service of Process.

X. "**Quash Expertises**" of any International Service of Process not compliant with International Private Law or Local rules of Procedure, even if completed under the Hague Convention. Our champ of excellence is quash of service of process not completed by Barrister-Solicitors or Judicial Officers i.e. Service by Private Investigators. Also available is quash of service completed by Mail. All based on "Quash of Affidavit". In all cases we propose either Court appearance or written authenticated expertise with foreign law back up documentation and on a "**No quash, No fee**" agreement.

XI. "**Extraordinary Service of Process**" Because our reputation often we are required to complete services in those countries we do not serve normally, i.e. Morocco, Tunisia.... service inside those countries, that are border countries of our geographic coverage or farm, those that by proximity we can serve. We service Europe Western and Eastern Countries including the Russian federation, and can serve exceptionally countries in the Middle East (Turkey, Israel....and the Magreb). The cost is double to that in our price list for Private Personal Service of Process.

**In summary;** We serve Hague Convention's signatory countries by "Direct Hague Central Authority Remittance" (Art. 3) and by "Alternative Channels" (Art. 5 and 10); Indeed we serve in those jurisdictions that have presented no opposition to the application of Article 10 a, b and c as Private Servers (to see which countries accept Art. 10 [click here](#)), and we also serve in those countries that have opposed to Article 10 prior failure and authorization of the Central Authority, that is to say by Article 5 applying Art. 10. For all the rest of Eastern European and non Hague countries we served as Special Process Servers. In all cases we issue an Affidavit of Service in English authenticated by the Consular representative.

**NO QUASH, NO RED TAPE and RELIABILITY.** We complete service without the hazards of bureaucracy, fast and accurate. We issue an authenticated affidavit of service by Consular agents or by the Central Authority, faster than anyone, guaranteeing our service in delivery and in legality, that is to say: without any extra cost to you, **we guarantee our service in Court!.**
